Article 95 List
Prepared as of 26 October 2021

Explanatory Note

This is the list of relevant substances and suppliers ECHA is required to publish under Article 95(1) of the Biocidal Products Regulation (BPR). Relevant substances are the combinations of active substances (AS), and substances generating an AS, with the product-type(s) (PT) for which a dossier ("the complete substance dossier") has been submitted and accepted/validated by a Member State under the BPR or Directive 98/8/EC. The substances listed in Annex I, Category 6 of the BPR are also subject to the Article 95 obligations (Article 95(6) of the BPR). These substances do not have a PT.

This list is structured per AS and PT. It includes the name and country of the relevant suppliers, if they are substance suppliers and/or product supplier, and the date of their inclusion in the list.

The information on the list is accurate to the extent of ECHA's knowledge as of the date of preparation of the list. If you would like to comment or send requests for modification of the list please submit the request for corrections of entries on the Article 95 list available at the ECHA website.

Inclusion reasons: Suppliers may be included on this list if they are participants in the Review Programme ('RP Participant'), supporters of AS benefitting from the transitional measures of Article 93 of the BPR ('Article 93'), supporters of other AS ('AS not in the RP') , submitters of product authorisation applications where the application includes an alternative AS dossier ('Third Party Dossier'), and submitters of applications in accordance with Article 95(1) of the BPR which have been found compliant by ECHA ('Art.95 submission')."

Types of suppliers: A substance supplier is an entity who manufactures or imports a relevant substance on its own or in biocidal products. A product supplier is an entity who manufactures or makes available on the market a biocidal product consisting, containing or generating that relevant substance.

For certain in-situ generated substances there is no biocidal product (precursor) made available on the market (e.g. substances generated in situ from ambient air or water): The substances are included on the Article 95 list because they are "relevant substances" in the sense of Article 95(1) in so far as an approval application dossier has been accepted or validated under the BPD or BPR. Article 95(2) does not apply unless a biocidal product is made available on the market. Accordingly, for these substances the name of company that submitted the dossier is listed but the supplier type is not relevant. Furthermore, alternative suppliers are not required to be listed).

Consequence of non-approval decisions: AS/PT combinations for which a non-approval decision is adopted by the European Commission are no longer considered as relevant substances. ECHA will remove such AS/PT combinations from the Art. 95 list. Suppliers concerned by the non-approval of their AS/PT combination are advised to verify with their evaluating Competent Authority how long they can stay on the market.

Consequence of withdrawal of the last participant (for AS/PT combinations in the Review Programme): For AS/PT combinations in the Review Programme where the last participant withdraws its support during the evaluation ("timely withdrawal"), the AS-PT combination will be removed from the Article 95 list. In case of a late withdrawal, the participant will be listed as 'Former RP participant' and the status of the AS/PT combination will be indicated as "Withdrawn – Awaiting non-approval decision".

Consequence of redefinitions (for AS/PT combinations in the Review Programme): If a Review Programme AS is redefined during the evaluation (Article 13 of Regulation (EU) No 1062/2014), ECHA will remove the 'old' AS entry from the Article 95 List (and add the new AS entry instead). ECHA will invite interested third parties to make a notification to take over as participant for the 'old' substance identity. The 'old' AS can stay on the market during the notification period, and also beyond if a compliant notification is received in line with Article 89(2) of the BPR. The requirement to be on the List of active substances and suppliers under Article 95 of the BPR does not apply in case of the "old" AS until a complete substance dossier is submitted and validated.
